# fix windows 10

By default, Windows sends a lot of your information to their servers sometimes without asking you to opt-in. Follow this guide to fix Windows 10 and restore your privacy.

Contents

# During installation Settings customization Use local account with Windows 10 On installed system General privacy settings Feedback & diagnostics Windows Update Windows Defender Wi-Fi Sense Cortana & web search Telemetry services Edge browser

During Installation

**1.** Do **NOT** use Express Settings. Click "Customize Settings", and make sure **EVERYTHING** is turned off.

# Get going fast

### Change these at any time. Select Use Express settings to:

Personalise your speech, typing and inking input by sending contacts and calendar details, along with other associated input data to Microsoft. Let Microsoft use that info to improve the suggestion and recognition platforms.

### What's this about?

Microsoft introduced a lot of new great features in Windows 10 such as Cortana. However, most of them are breaking your privacy. For example if you're using the default settings, each time you start typing in search box in taskbar (to open an application or search for a file on your computer), your local search terms and location are sent to Microsoft, some of which advertise to you.

Windows have to protect user privacy by default. Since it doesn't, you can follow these steps to disable the parts of Windows which are invasive to your privacy.

**2.** It's strongly preferred that you use a local account with Windows 10. You can do it while "Make it yours" screen appears by clicking "Skip this step". After that it's safe to follow instructions.

### On installed system

**1.** Head to Settings > Privacy, and disable everything, unless there are some things you really need (like allowing websites access to your language list). At least pay attention to "General", "Speech, inking & typing" and "Location" pages.

, stangs

## Updates from more than one place

Download Windows updates and apps from other PCs in addition to Microsoft. This can help speed up app and update downloads.

### Learn more

When this is turned on, your PC may also send parts of previously downloaded Windows updates and apps to PCs on your local network or PCs on the Internet, depending on what's selected

Get updates from Microsoft, and get updates from and send updates to

PCs on my local network

T CS ON MY IOCAL INCLINICITY, AND T CS ON THE INCLINE
---

**4.** While within the Update & Security page, go to "Windows Defender" and turn off "Cloud based Protection" and "Sample submission".

i macy surroment

### Sample submission

Help us make Windows Defender better by sending Microsoft malware samples so we can learn about potential security problems and catch them earlier.

**5.** Head to Settings > Network & Internet > Wi-Fi > Manage Wi-Fi settings. Turn off both switches to disable Wi-Fi Sense.

, ,

- Settings

MANAGE WI-FI SETTINGS

# Wi-Fi Sense

Wi-Fi Sense connects you to suggested Wi-Fi hotspots and to Wi-Fi networks that your contacts share with you. By using Wi-Fi Sense, you agree that it can use your location.

Remember, not all Wi-Fi networks are secure.

Learn more

Connect to suggested open hotspots

Connect to networks shared by my contacts

Give and get Internet access without seeing shared passwords. You'll get connected to Wi-Fi networks your contacts share, and they'll get connected to networks you share.

**6.** Disable Cortana and web search in "Search bar" by clicking on it, going to Settings by pressing on a cog icon, and turning off both switches.

**7.** To disable telemetry open Command Prompt as administrator by clicking right mouse button on Start button or by pressing Win+X shortcut, and enter the following:

```
sc delete DiagTrack
sc delete dmwappushservice
echo "" > C:\ProgramData\Microsoft\Diagnosis\ETLLogs\AutoLogger\AutoLogger-Diag
reg add "HKLM\SOFTWARE\Policies\Microsoft\Windows\DataCollection" /v AllowTeler
```

**9.** If you're using Microsoft account, it's preferred to convert it to local account by heading to Settings > Accounts > Your accounts and clicking on Sign in with a local account instead and following the guide.

If you can't do this, turn off sync settings. Head to Settings > Accounts > Sync your settings and switch it off.
